Body Measurement Tips

When measuring, keep tape snug but not tight.

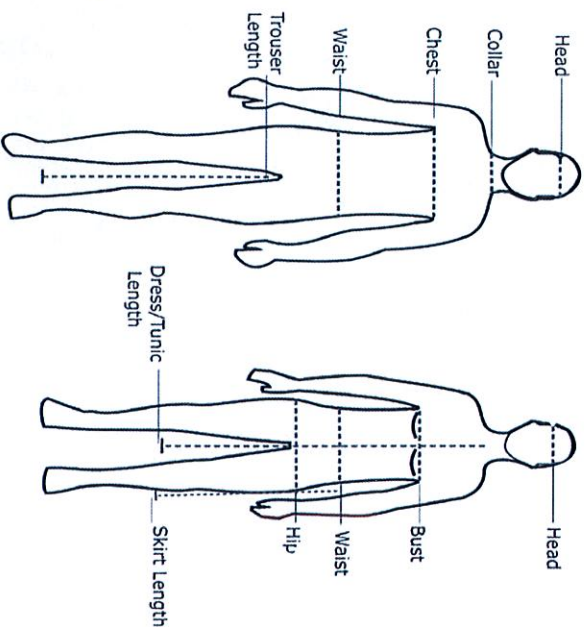

Chest/Bust Circumference
With arms relaxed at side, measure around the largest part of the chest/bust and across the shoulder blades of the back.

Waist Circumference
Measure around waist at the natural waistline, just above the hipbone.

Inside Leg
Measure from the top of the inside leg to the floor.

Hips
Measure around the fullest part of the hips as a guideline, this is often 20cm below the natural waistline.

Dress Length
Measure from the centre back neck in a straight line.

To ensure the correct size refer to the measuring guide to determine where to take the correct measurement from. Compare either the chest or waist measurement to each garment size chart. Select your size based on the measurement you have taken, we have allowed for a comfortable fit and room for the wearer to grow.
